Frameworks: React, Angular, Bootstrap, jQuery, Express.js, Django

Databases: MongoDB Atlas (AWS), MySQL, Oracle, Microsoft SQL Server

Other Technologies: Excel, Git, Node.js, Sequelize.js, Heroku

EDUCATION

Full Stack Development Certificate - University of Texas | 2020

Google Analytics Individual Qualification Certification | 2020

Bachelor of Arts in Economics - Stanford University | 2017

PROJECTS

Inside Job: <https://inside-job.herokuapp.com> | Github: <https://github.com/Ramong06/inside-job>

- Description: Inside Job is a 3-page web application which serves as a research hub for individuals in the job market. It allows for invaluable insights into the company culture, the outward facing public outlook and the financial health of a company.
- Role: Researched the Financial Modeling API and incorporated it into the site using axios requests and React ChartJS. Wrote React components and created our databases using Excel, Mongo and Atlas Cloud Platform.

Salud!: <https://salud-cocktails.herokuapp.com/home> | Github: <https://github.com/mcraepv/Salud>

- Description: An app that allows users to search for cocktails by name or ingredients, to find the recipe for these cocktails, and to save the cocktail to their favorites.
- Role: Created the models for the MySQL database for storing cocktail information using Sequelize, wrote the Express API routes in Node.js and developed the Favorites page on the frontend using Angular.

Deal or No Deal: <https://ta05.github.io/Deal-Or-No-Deal/intro.html> | GitHub: <https://github.com/ta05/Deal-Or-No-Deal>

- Description: A re-creation of the popular NBC game show that also displays statistical information to guide users in their in-game decisions.
- Role: Wrote the game logic and algorithms in JavaScript and some of the HTML framework and CSS styling.
